Aspiring Java Developer currently pursuing a second degree in IT at UIT, looking for an internship opportunity to apply my knowledge in a professional environment. I have a solid grasp of Java Core, Spring Boot, and SQL through hands-on personal projects, including a full-stack management system. My background in engineering has equipped me with strong logical thinking and a disciplined approach to problem-solving. I am a fast learner, eager to contribute to the team's success, and committed to improving my technical skills through every assigned task. This CV comprises my experiences gained from 2022 to the present.

EDUCATION

Ton Duc Thang University 2018 - 2022
Chemical Engineering

University of Information Technology 2025 - Feb 2027
Information Technology

LANGUAGE

Vietnam Native

English Good at reading technical documents

SKILLS

Programming Languages:
Java (Solid grasp of Core concepts and OOP), C++, PHP, SQL, HTML, CSS, JavaScript

  Participated in designing manual and automation testing for comment & reaction backend services

Mitek Vietnam Octobor 2022 - May 2025
Technical Staff

PERSONAL PROJECT

Real Estate Management System | Backend Developer

- **Description:** A comprehensive web application for managing buildings, customers, and transactions for real estate agencies.
- **Technologies:** Java 17, Spring Boot 3, Spring Security (JWT), Hibernate/JPA, MySQL.
- **Key Features:**

Designed a normalized database with 13 tables, handling complex relationships (One-to-Many, Many-to-Many).
Built RESTful APIs following Layered Architecture (Controller-Service-Repository).
Implemented Advanced Search using Dynamic SQL (Search Builder pattern) to filter data by multiple criteria.
Secured the system with JWT Authentication & Role-based Authorization (Admin/Staff).
